Continued Fractions for Constants and Functions

Carter Mitchell, Sydney Spacek

November 9, 2026

Background

Methods

Results

The constants and functions used are listed below:

- First constant: $\frac{\pi}{4}$.[1]
- Second constant: e.[2]
- Third constant: $\frac{30}{\pi^2}$.[3]
- Fourth constant: $\frac{1}{2G}$, for Catalan's constant G.[4]
- Fifth constant: $\frac{1}{1-\ln 2}$.[5]
- First function: e^x.[6]
- Second function: $\sin x$.[7]
- Third function: $\sinh x$.[8]
- Fourth function: $\tan x$.[9]
- Fifth function: $\tanh x$.[10]
